7. (Original) A method for operating a client device that interfaces a television with a television network, comprising:  
receiving a viewer request for a program;

1 examining program data in an electronic program guide executing at the  
2 client device to ascertain whether the program requested by the viewer is in  
3 letterbox format;

4 determining whether the television is capable of supporting anamorphic  
5 programs; and

6 in an event that the program is in letterbox format and the television is  
7 capable of supporting anamorphic programs, converting the program from the  
8 letterbox format to anamorphic format prior to output to the television.

9  
10 8. (Original) A method as recited in claim 7, wherein the examining  
11 comprises checking a format field in the program data to identify whether  
12 programs are marked as being anamorphic.

13  
14 9. (Original) A method as recited in claim 7, wherein the determining  
15 comprises ascertaining from user settings whether the television is capable of  
16 supporting anamorphic programs.

17  
18 10. (Original) A method as recited in claim 7, wherein the converting  
19 comprises vertically stretching the program by a ratio of 4/3.

20  
21 11. (Original) A method as recited in claim 7, wherein the converting  
22 comprises vertically stretching the program by a ratio of M/N, where M > N.

23  
24 12. (Original) A method as recited in claim 7, wherein the converting  
25 comprises using multiple polyphase filters to resample the program.

1  
2       13. (Original) A method as recited in claim 7, further comprising  
3 receiving the program data as part of a broadcast feed.
